

LOSI TIRE COMPOUNDS

FIRMEST

SOFTTEST

VIOLET 

Violet compound tires are the firmest tires. Due to their firmness these tires are excellent for on-road driving, and are recommended for use as front tires on asphalt or concrete.

SILVER 

Silver compound tires are excellent all-around, firm tires. Due to their durability and versatility, they can be used on surfaces ranging from loose soil to turf or asphalt.

BLUE 

This compound typically performs best in warm outdoor conditions that are hard-packed rock or dirt surface. Blue compound tires are commonly used for rock crawling.

PINK 

Pink compound tires are commonly used when racing indoors on damp clay surfaces. This compound typically performs best on high-traction or "tacky" surfaces.

RED 

Red compound tires provide exceptional bite and tread life. This compound is commonly used on dry hard-packed outdoor racetracks. Very safe compound for all conditions.

WHITE 

White compound tires will provide increased grip and traction on most surfaces, and are proven to perform very well in cold weather conditions.

GREEN 

Green compound tires offer maximum traction and durability on a wide range of track conditions. This compound provides optimum handling on both wet and dry surfaces.
